Product Features:

Pack size

Colours Available

More than 1000 shades

Coverage

160 – 180 Sq. Ft./L/2 coats

Pre-Painting Steps:

Cleaning

Filling cracks

New Plastered surfaces: It should be allowed to cure for at least 3 months prior to painting.

Old Surface / Previously painted surface: Clean thoroughly with wire-brush to remove loose/flaky material, grease, and dirt. Ensure that the surface is free from fungus, algae and moisture. Rectify and smoothen minor cracks and uneven surface with WALLPLUS Putty followed by two coats of WALLPLUS Water Primer. Fill the bigger cracks using cement & sand mixture in the ratio of 2:3 before application of putty.

Application Procedure:

Mix 3 part of LUXORE INTERIOR EMULSION with 1 part of clean water by volume. Avoid under thinning or over thinning of paint. Stir the mixed paint properly before use. Use a good quality paint brush, roller or spray gun for painting.. Apply minimum two coats of Luxore Interior emulsion in a time gap of 4 to 6 hrs. between each coat. After taking out the required quantity the lid of the container must be closed tightly and avoid direct contact of bare hand.

Recommended tools for application:

Brush

Roller

Spray
